IN THE CLAIMS

Please amend claims 1, 2, 48-51, 86-89 as follows:

1. (Amended) A method for tracing an electronic device having an agent initiating communication and providing identifying indicia to a host system, said electronic device connectable to said host system through a global network, said method comprising the steps of:

automatically providing said host system with said identifying indicia through said global network for determining the identity of said electronic device; and

providing said host system with one or more [of the] global network communication links used to enable transmission between said electronic device and said host system, <u>said</u>

<u>transmission via</u> said communication links used for determining the location of said electronic device.

- 2. (Amended) The method of claim 1 wherein said global network [is the] <u>includes</u> Internet.
- 48. (Amended) The method of claim 44 wherein the Agent establishes communication with the host system independent of <u>normal operations of [instructions from]</u> the electronic device.
- 49. (Amended) The method of claim 42 wherein the Agent is activated independent of normal system operations of the electronic device [the computer's operating system].

50. (Ámended) The method of claim 42 wherein the Agent is activated prior to <u>normal</u> system operations of the electronic device [loading the operating system].

Bang,

51. (Amended) The method of claim 49 wherein the Agent is activated by loading into an internal volatile memory and running the Agent prior to activating <u>normal system operations of the electronic device</u> [the operating system].

D.

86. (Amended) The apparatus of claim 82 wherein the Agent is configured to establish communication with the host system independent of <u>normal operations of</u> [instructions from] the electronic device.

- 87. (Amended) The apparatus of claim 83 wherein the Agent is configured to be activated independent of <u>normal system operations of the electronic device</u> [the computer's operating system].
- 88. (Amended) The apparatus of claim 87 wherein the Agent is configured to be activated prior to <u>normal system operations of the electronic device</u> [loading the operating system].
- 89. (Amended) The apparatus of claim 87 wherein the Agent is configured to be loaded into an internal volatile memory and executed prior to activating <u>normal system operations of the electronic device</u> [the operating system].
